DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of the invention of Group I (claims 1-4) in the reply filed on 7/29/05 is acknowledged. The traversal is on the ground(s) that there is no serious burden on the examiner. This is not found persuasive because the apparatus clearly does not required the specific step as claimed in the method as stated in the restriction requirement. Therefore, the examiner is not required to perform additional searches and additional task in applying the prior art for the particular method step, which would be additional burden. Accordingly, claims 5-7 are withdrawn from further consideration.

The requirement is still deemed proper and is therefore made FINAL.

Specification

2. The abstract of the disclosure is objected to because it should avoid using phrases which can be implied, such as, "The invention provides" in line 1 of the abstract. Correction is required. See MPEP § 608.01(b).
3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "the side portion thereby being positioned either perpendicular to the seat portion for storage" as claimed in lines 2-3 of claim 4.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Art Unit: 3751

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 4 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to disclose how to make the transfer platform as claimed wherein the side portion being "positioned either perpendicular to the seat portion for storage" as claimed in lines 2-3 of claim 4. Therefore, claim 4 is being examined as "as best understood."

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Mabrey.

Mabry discloses a transfer platform comprising a seat portion (20) and at least one side portion (where 10 is pointing) extending from the seat portion; a chamfered edge on the at least one side portion (the edge side between member 32 and 34, see Fig. 1) providing a slightly inclined surface at an outer margin of the platform; a raised lip (the outer lip of seat toilet seat 20) extending along a first edge (the edge opposite the edge where member 32 connected to member 20) of the seat portion; and at least one fastening means (30) operably connected to a second edge of the seat portion (see

Art Unit: 3751

Figs. 5 and 6), the second edge being parallel to the first edge. An aperture is within the seat portion (20) through which waste may be transmitted into a receptacle positioned beneath the aperture. The at least one side portion is formed of unitary construction with the seat portion (as shown). The at least one side portion is operably connected to the seat portion by at least one hinged element (30), the side portion is capable of being positioned either perpendicular to the seat portion for storage, or positioned so that the side portion is extended from the seat portion to form a substantially planar surface for a physically challenged individual to be moved across the side portion to access the seat portion.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan N. Nguyen whose telephone number is 571-272-4892. The examiner can normally be reached on Monday-Friday (10:00-6:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Justine R. Yu can be reached on (571) 272-4835. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
